

illion BankStatements: Security is in our DNA

Security

- ✓ illion BankStatements is independently **designed and vetted by world-class security experts** to ensure the highest levels of data protection and security.
- ✓ Your customer's data is **encrypted with bank-level 256-bit encryption**, secured by 2048-bit keys. This is the same level of protection their bank provides.
- ✓ Your customers' **account ID and password are never stored**. They are securely discarded once they have been encrypted and passed to the bank.
- ✓ The service is a **one-time retrieval** – it only happens with your customers' authorisation.
- ✓ **We do not store copies** or have access to your customer's bank statements, they are only sent directly to you, their lender or broker.

Privacy

- ✓ BankStatements is **Australian owned and developed** technology.
- ✓ Our servers are located in **secure Australian data centres**, so your customers' data never leaves our shores.
- ✓ BankStatements is **provided by illion** (formerly Dun & Bradstreet), who provide the leading consumer and commercial credit registries in Australia and New Zealand.
- ✓ Adherence to **Australian privacy principles and laws** is at the core of our service.
- ✓ Your customers' **personal details are never shared** with or sold to third parties.
- ✓ BankStatements helps you meet your **AML and KYC obligations**.
